Noida - 201301

Known Issues

Bug Id	Description	Business Context
54780	Form image is not showing in generated Process Report on server deployed o RHEL	Environment Specific issue
54775	Opal Viewer: Zone is not showing related highlighted area in Document in Work item	Zoning can be alternatively used in Applet Viewer
54739	Add row in repeater is not showing all the controls when clicked first time in html	Complex Repeater issue with more than one row. However this is rare scenario and in most of the case repeater would be having the single row
54728	Unable to set priority on workitem	This issue is coming only on Android 4.2.2 , otherwise it is working fine
54557	In case of IMAP & DELETE, mails should not move to the Destination folder	System Service - Initiation Agent does not remove the emails when mail-IMAP protocol is used with configuration setting - DELETE. Although MOVE operation is functional and all operations are functional with POP3 protocol
54491	Opal Viewer:-In Embedded view when perform print functionality, current page with annotation and current page without	This is coming only when workitem opening area is very small in embedded view. Normally user will not use such small area to

	annotation options are not shown.	open the Workitem
54490	Opal Viewer:-In Embedded view incomplete zoom % value shown in drop-down.	This is coming only when workitem opening area is very small in embedded view. Normally user will not use such small area to open the Workitem
54444	Opal Viewer: Image & Text Stamp are not working on imported document	This is coming only when workitem opening area is very small in embedded view. Normally user will not use such small area to open the Workitem
54286	Operation failed error on property association during process designing	This behavior is shown when user closes the browser immediately after saving multiple activity windows. It will work fine if we refresh the Process
54285	Simulator is not working on 64 bit java	Simulator is working fine on 32 bit Java
53917	Under Dashboard, Picklist is not opening when click on line icon to add process name	This behavior is shown when we need to select some pick list data in Dashboard report. This can be achieved by configuring Dashboard using desktop and then opening in Mobile
53681	Forms should have resizing options through the mouse	Using the property panel, user can resize the forms
54795	Export utility is not getting started if we use Long data type column in Export Table	This observation is shown only in Oracle database.
54793	Scroll bar is not getting enabled in Form Tools, if open form after mapping control in fragment	User can refresh the Form in case of Fragment to get scroll back
53539	Whenever we login OF Services for 1st time, Cabinet Type should be already set as Active	By default cabinet can't be set Active as it can be changed again to Archive in current

		architecture. This information is available in Documents
